

Canada - The Outdoors never looked so good!

7 nights from £1,599 per person

Very few places in the world have all of the natural good looks and grandeur of Alberta and British Columbia in Western Canada.

These two states are blessed; particularly if you hit it right in season with magenta blue skies, snow tipped peaks, neat, tidy evergreen forested slopes reaching right down to the surreal turquoise and cobalt lakes below. World class National parks and a fierce national pride of looking after their environment ensure that the beauty of this region is maintained to the very highest level, allowing all ages and abilities to enjoy the great outdoors.

It truly does feel like you're walking through the pages of a travel brochure here. Everyone can now enjoy this region with our wide range of things to do from a lazy float trip down the Bow river on a sunny afternoon, to a trek on horseback through the forests around Banff or an exciting snow coach trip over the Athabasca Glacier, fine hotels, world class service and friendly welcoming Canadians all help make this one of our favourite destinations.
